SP SRL - 2 53SW

Product code: 19.300.0

Description:

Retractable fall arrester with a length of 2.0 m. At present, it is the most effective fall arrester with a minimum fall factor thanks to the retractable device. The compact design, when the shock absorber is attached to the harness's back strap, does not interfere with work as well as retractable straps. It is also recommended to order temporary anchoring points SP Stowage point for attaching carabiners.

SP SRLD - 2 - 53SW

Product code: 19.301.0

Description:

Retractable fall arrester length 2.0 m double. Currently, it is the most efficient gripper with a minimum drop factor thanks to the retractable device. The compact design, when the shock absorber is attached to the harness's back strap, does not interfere with work as well as retractable straps. It is also recommended to order temporary anchoring points SP Stowage point for attaching carabiners. Designed especially for scaffolders.

IMPORTANT: Distance of the developed absorber after catching a fall is 1.3 m.

WARNING: The securing point must be at least 5.3 m above the ground.

ATTENTION: The reserve after catching the fall is 50 cm.
